Opti-DN

mini-iceboat

The Optimist-DN is designed for kids between 10 - 16 years old, but is big enough for an adult to sit and sail in. The reason for this design is to get an opportunity for the kids to get into the iceboat sport in a smaller and less expensive boat that doesn't hike so easy..

(ENGLISH)

Opti-DN, class-rules, 2002-02, on trial.

- 1. Fuselage** - construction and design is optional, maximum length 3000 mm including hardware, the width is optional. Material, wood or laminate. Fuselage must have sufficient flotation capacity. Steering - optional construction, technically acceptable, without looseness. Minimum weight including hardwarekg.
- 2. Plank** - maximum length 2000 mm, maximum width 180 mm. Material optional; metal pipe, wood or laminate. Minimum weight including hardwarekg.
- 3. Sail** - as Optimist class, the cloth is optional.
- 4. Mast, boom and sprit** - the same as the Optimist.
- 5. Rigging lines** - one forestay and two sidestays, possible to adjust.
- 6. Runners** - the length can be shorter than DN-class runners, but not longer. Steering runner must have parking brake.
